Fort Myers, FL., Feb. 13, 2017 Lee County Clerk of Court - Records Inquiry Site Issue

The Court Records Inquiry site was discovered today to have an issue with displaying information that is confidential. It is believed that this issue was isolated to only a few cases. However, in order to thoroughly review the extent of the issue, Clerk Linda Doggett directed that the Court Records Inquiry site be shut down until the problem is fixed and the site retested.

Prior to the new Court Records Inquiry site, the ability to view court case documents required a trip to the Justice Center or a request using the Records/Information Request online feature. This will be required once again until the site security is fixed and fully vetted.

Protecting confidential and sensitive information remains a top priority of your Clerk's Office.
